InfoSci®-Journals Database

InfoSci®-Journals is a database of nearly 25,000+ articles sourced from more than 185+ interdisciplinary journals featured in prestigious indices including Web of Science and Scopus. With no DRM and unlimited simultaneous users, this database contains peer-reviewed research by over 100,000+ scholars worldwide.

New Open Access Fee Waiver (Offset Model) Initiative

For any library that invests in IGI Global's InfoSci-Journals database, IGI Global will match the library's investment with a fund of equal value to go toward subsidizing the OA article processing charges (APCs) for their students, faculty, and staff at that institution when their work is submitted and accepted under OA into an IGI Global journal.*

IGI Global Subject Coverage:

- Business & Management
- Computer Science & Information Technology
- Education
- Engineering
- Environmental, Agricultural, & Physical Sciences
- Government & Law
- Library & Information Science
- Media & Communications
- Medical, Healthcare, & Life Sciences
- Security & Forensics
- Social Sciences & Humanities

*The fund will be offered on an annual basis and expire at the end of the subscription period. The fund would renew as the subscription is renewed for each year thereafter. The open access fees will be waived after the student, faculty, or staff's paper has been vetted and accepted into an IGI Global journal and the fund can only be used toward publishing OA in an IGI Global journal. Libraries in developing countries will have the match on their investment doubled.
