Sage Open Access

Sage's mission is founded on the belief that education is intrinsically valuable and that the dissemination of useable knowledge is fundamental to the foundations of a healthy society. Open access publication, an innovative publication mode whose key principle is the dissemination of research to the broadest community by making research freely available to all, is a natural expression of that mission.

Sage Open

Sage has supported the growth of OA publishing for over a decade. We are a founding board member of the Open Access Scholarly Publishers Association (OASPA) and launched Sage Open, the first broad-spectrum OA journal in the social and behavioral sciences.

Sage Choice

As the scholarly communication landscape evolves, we continue to support open access through our fair and transparent Sage Choice (hybrid OA) publishing option, in having one of the most liberal (Green deposit OA) author archiving policies, and through our portfolio of Gold open access journals.

Sage Gold OA titles are now offered separately as the "Sage Gold OA package". Please remember to load this into your ERM. Usage reports show only usage from paid titles. Ensuring discoverability at your institute will be easy. Customer-specific KBART files are provided by Atypon, so you can upload your exact entitlements. If you are selecting packages simply select both the Premier package and the all Gold OA package.
