Dyna AI generates responses using AI and Dynamic Health content. [Tips for Use](#)

What is oxygen therapy?

Oxygen therapy is the administration of supplemental oxygen at a concentration higher than the 21% available in room air to treat or prevent hypoxemia and hypoxia.^{1,2} It is delivered as a gas from a concentrator or tank, with or without humidification, to improve oxygen transport, reduce the work of breathing, and alleviate symptoms of respiratory distress.^{2,3}

Ask a Follow-up

- What are the indications for oxygen therapy?
- How is oxygen therapy administered in different settings?
- What are the safety precautions for oxygen therapy?
- What are the potential complications of oxygen therapy?

Yaptığınız arama, Dyna AI tarafından öncelikle klinik bir sorguya dönüştürülmüştür. Bu sorguya verilen yanıtlar, Dynamic Health platformundaki kanıta dayalı içeriklerden sentezlenmiştir. Dilerseniz takip soruları oluşturarak konuyu daha da detaylandırabilirsiniz.

Aramanızla ilgili tüm sonuçları aşağıda görüntüleyebilir, sol tarafta yer alan filtreleri kullanarak istediğiniz şekilde daraltabilirsiniz.

Ayrıca arama sonuçlarını yalnızca videolar, resimler, hastalar için kılavuzlar veya yönetici rehberleri olarak da filtreleyebilirsiniz.

*Dyna AI ile Dynamic Health klinik karar aracını mobil cihazlarınızda da kullanabilirsiniz.
Uygulamayı indirdikten sonra yapmanız gereken tek şey, 'Sign In' seçeneğini kullanarak daha önce oluşturduğunuz kişisel hesap bilgilerinizle giriş yapmaktır.*
